Staff Software Engineer | AI Platforms & Distributed Systems

SUMMARY

Staff-level software engineer specializing in AI-enabled developer platforms, distributed systems, and event-driven architectures. Experienced building SaaS platforms from startup through enterprise scale, with deep hands-on expertise in TypeScript, GraphQL, cloud infrastructure, and LLM-integrated systems. Strong track record leading greenfield initiatives, modernizing engineering practices, and helping teams adopt AI-assisted development workflows.

EXPERIENCE

NEWMARK — STAFF SOFTWARE ENGINEER

October 2025 – Present

100-year-old publicly traded commercial real estate firm offering brokerage, transaction support, and workplace strategy services.

- Led development of Newlitic Enterprise, a greenfield platform supporting enterprise commercial real estate clients with global portfolios.
- Built AI-enabled engineering workflows using Claude, Cursor, and GitHub Copilot, including automated code review processes and development standards.
- Designed an OpenAI tool-calling chatbot enabling non-technical users to execute real-time analytics queries.
- Developed agentic browser-based test automation using Playwright and Agent Browser.
- Helped establish hiring and technical evaluation processes for AI-assisted engineering workflows.

Technologies: Cursor, Claude Code, GitHub Copilot, OpenAI API, Agent Browser, GraphQL, Playwright, TypeScript, C#, Azure SQL Server, Azure Service Bus

DEXA.AI / CHARLIE LABS — FOUNDING ENGINEER

April 2024 – October 2025

Startup focused on LLM-powered knowledge retrieval and later agentic coding systems.

- Owned the Charlie API layer responsible for consuming and normalizing events from GitHub, Linear, and Slack, enabling real-time interaction between developers and the Charlie coding agent.
- Wrote the "Hey Charlie" experience in GitHub, Linear, and Slack.
- Implemented telemetry, tracing, and retries to improve reliability, latency, and fault recovery.
- Pre-pivot, developed Temporal-based pipelines to crawl and index 10,000+ podcast episodes monthly, integrating OpenAI for entity extraction and Qdrant for vector-based retrieval.

Technologies: TypeScript, Node/Bun, Temporal, GCP Pub/Sub, OpenAI API, EdgeDB, Qdrant, Google Cloud Platform

WORKTANGO (FORMERLY KAZOO)

Senior Software Architect

January 2021 – April 2024

Team Lead

July 2019 – January 2021

Vista Equity Partners–backed Employee Experience platform serving over 1M monthly users.

- Architected WorkTango’s GraphQL microservice platform serving over 1M monthly users on a unified experience.
- Led integration of strategic acquisitions and third-party systems to unify data models and authentication.
- Prototyped survey analytics using OpenAI and Google Vertex LLMs to extract insights from text responses.
- Unified two legacy systems (Ruby on Rails and Node.js) and doubled throughput for a 6-person agile squad.
- Built the first microservice for employee data synchronization across multiple applications.

Technologies: TypeScript, Node.js, GraphQL, GCP, PostgreSQL, Redis, Docker, Kubernetes

ADDITIONAL LEADERSHIP ROLES

Grubhub — Engineering Team Lead

May 2018 – August 2018

- Led development of the Positouch point-of-sale integration prototype.
- Managed a 5-person offshore development team working in Java Spring and .NET.

Guaranteed Rate — Senior Software Engineer

March 2016 – March 2018

- Built a Clojure-based event-sourcing microservice enabling near-real-time loan tracking.
- Developed .NET services to handle bulk mortgage updates for investor sale.
- Influenced adoption of SaaS platform strategy through technical evaluation work.

JumpForward — CTO

March 2015 – February 2016

- Managed a blended 9-person engineering team across onshore and offshore development.
 - Implemented CI/CD, code review, and automated deployment pipelines.
-

SPOTLITE / PERKSPOT

VP of Engineering

August 2011 – May 2015

Software Architect

September 2010 – August 2011

Angel-funded employee discount platform later acquired by Rally Health.

- Scaled the Perkspot platform to 3M users and built Spotlite's private exchange platform enrolling \$100M annually in premiums.
 - Led technical due diligence for Rally Health acquisition and expanded engineering organization from 3 to 14 developers.
-

EDUCATION

UNIVERSITY OF CHICAGO

Master of Arts

KNOX COLLEGE

Bachelor of Arts
